Deepcode.ai.

Grammarly for code.

Automated code cleaning to write better code by automatically finding and fixing vulnerabilities in seconds.

```
fl.close()  
  
enc = base64.b64encode(contents)  
  
enc = base64.b64encode(contents).decode()  
  
if (format == `base64z`):
```

*** DeepCode Critical Suggestion

Unsanitized user input flows from `form.errors.as_json()` to `django.http.HttpResponseBadRequest(arg 1)`. This may result in a **Cross-site Scripting** vulnerability: by injecting malicious input into an HTTP form, an attacker may execute arbitrary code in client's browser. To fix it, consider sanitizing the input using `django.utils.html.escape()`.

Consensus.app

Use AI to do your research. Type in a topic/question you're researching and it will search through this huge database of scientific papers to find all the relevant information.

The screenshot shows the Consensus.app mobile application interface. At the top, there is a navigation bar with a 'C' icon, a 'beta' badge, a search bar containing 'how to be happier', and 'Sign up' and 'Sign In' buttons. Below the search bar, there are three research snippets displayed in a card format.

Snippet 1: We can make our life happier if we: a) get rid of useless things; b) buy more things; c) sell things we do not need.
Published in *Athletic Therapy Today* | R. Ray et al. | 1996

Snippet 2: These studies demonstrate that listening to positive music may be an effective way to improve happiness, particularly when it is combined with an intention to become happier.
Published in *The Journal of Positive Psychology* | Yuna L. Ferguson et al. | 2013

Snippet 3: Among the non-income factors, family togetherness, a good working environment and a higher level of education can contribute to making people happier.
Published in *South African Journal of Economics* | D. Mahadea et al. | 2008
